

ABA: 2205

S0

The image shows a cross-sectional view of a brain, likely from an MRI or PET scan. The brain tissue is represented by a blue, textured area against a black background. A prominent vertical line of high intensity (brighter blue/white) runs through the center of the brain, suggesting a region of abnormal activity or a structural feature. The image is overlaid with a white grid consisting of a horizontal line and two vertical lines, dividing the brain into four quadrants. The text 'ABA: 2205' is located in the top-left corner, and 'S0' is in the bottom-left corner.
