

ABA: 2693

S0

This is an axial brain scan image, likely a PET or SPECT scan, showing a cross-section of the brain. The image is predominantly black, with a blue highlighted region indicating areas of increased activity or uptake. The blue region is concentrated in the lower central part of the brain, possibly involving the brainstem or a specific subcortical structure. The image is overlaid with a white grid consisting of a horizontal line and two vertical lines. The text 'ABA: 2693' is located in the top left corner, and 'S0' is in the bottom left corner.
