

ABA:67787338

Arc

The image displays a coronal section of a brain, likely from a rodent, with a color scale indicating signal intensity. The left hemisphere (viewer's left) shows a prominent, bright yellow/orange spot at the bottom, labeled 'Arc', which corresponds to the Arcuate Nucleus. The rest of the brain tissue is predominantly blue, indicating lower signal intensity. The right hemisphere (viewer's right) is mostly blue. The top left corner is labeled 'ABA:67787338', which is a unique identifier for the subject or experiment. A white crosshair is visible in the center of the image.
