The image displays a 2D heatmap of a brain-like structure, likely a butterfly brain, rendered in blue against a black background. The structure is roughly circular with a central vertical axis and a horizontal axis, intersecting at the center. A bright, multi-colored spot (yellow, green, and blue) is located at the top of the central vertical axis, indicating a region of high intensity or activity. The overall shape is symmetrical and resembles a butterfly's wings.
