CPu medial

A medial view of a brain, likely a rodent, with a blue highlighted region in the left hemisphere. The brain is centered against a black background. A white crosshair is overlaid on the image, with a vertical line passing through the center and a horizontal line passing through the middle of the brain. The blue region is located in the left hemisphere, roughly in the middle of the brain's width and height. It has a somewhat irregular, elongated shape, with a brighter, more intense blue area in the center of the highlighted region. The rest of the brain is a dark, mottled blue color.
