VMH

This is a fluorescence microscopy image of a brain section. The image is divided into four quadrants by a vertical and a horizontal white line. The top-left quadrant shows a bright, irregularly shaped region of fluorescence, primarily in shades of blue and cyan, indicating a high concentration of the fluorescent signal. The top-right quadrant is mostly dark, with some faint, diffuse fluorescence. The bottom-left and bottom-right quadrants are also dark, with very little visible fluorescence. The overall shape of the brain section is roughly circular, with some internal structures visible as darker areas.
