

ABA:68301162

OB anterior

The image displays a brain scan, likely a PET or SPECT scan, showing two distinct, blue, lobulated structures. These structures are positioned symmetrically on either side of a central vertical line, which appears to be the midline of the brain. The structures have a somewhat irregular, lobulated appearance. The background is black, and there are faint horizontal and vertical white lines intersecting at the center, possibly representing the scan's coordinate system. The text 'ABA:68301162' is located in the top left corner, and 'OB anterior' is in the bottom left corner.
