

ABA: 68301664

ventral S

The image displays a coronal cross-section of a brain. A vertical white line divides the image into two halves. A horizontal white line crosses the middle of the image. The brain tissue is represented by a blue color map. In the lower central region, there is a small, bright, multi-colored spot (yellow, orange, and red) indicating a localized area of high activity or intensity. The rest of the brain area shown is a uniform blue color.
