IC

A blue brain scan image, likely a PET or SPECT scan, showing a coronal cross-section of a human brain. The image is centered on a black background. A white crosshair is overlaid on the image, with a vertical line and a horizontal line intersecting at the center. The brain tissue is represented by a solid blue color, with some darker blue areas indicating higher intensity or activity. The overall shape of the brain is roughly oval, with some internal structures visible as darker blue regions.
