

ABA: 68499479

SCN

The image shows a coronal section of a brain. A horizontal white line and a vertical white line intersect at the center. Two large, roughly circular blue regions are visible, one on the left and one on the right, representing the hemispheres of the brain. The blue color indicates fluorescence or a specific staining. The text 'ABA: 68499479' is in the top left, and 'SCN' is in the bottom left.
