

ABA: 68637551

LH

This is a brain scan image, likely an axial slice, showing a localized area of high activity in the left hemisphere. The activity is represented by a color gradient from blue (low activity) to red (high activity). The high-activity region is located in the lower-left quadrant of the image, near the bottom edge. The rest of the brain area shown is predominantly blue, indicating low activity. A vertical line and a horizontal line intersect at the center of the image, dividing it into four quadrants. The text 'ABA: 68637551' is in the top-left corner, and 'LH' is in the bottom-left corner.
