

ABA: 68667443

CPu medial

A coronal slice of a brain image showing activation in the left hemisphere. The activation is represented by a blue-to-white color scale, with the most intense areas appearing white. The activation is localized to the medial frontal region, specifically the area around the cingulate gyrus. The image is overlaid with a white grid consisting of a vertical line and a horizontal line, dividing the brain into four quadrants. The text 'ABA: 68667443' is located in the top left corner, and 'CPu medial' is located in the bottom left corner.
