SPa dorsal

A blue, symmetrical, butterfly-like shape is centered on a black background. The shape is divided into four quadrants by a white crosshair. The top-left and top-right quadrants are filled with a solid blue color. The bottom-left and bottom-right quadrants are also filled with a solid blue color, but they have a slightly more irregular, jagged edge compared to the top half. The overall shape is reminiscent of a butterfly or a stylized flower.
