

ABA: 69013708

Pn

The image displays a coronal cross-section of a brain. The left hemisphere (viewer's left) shows a distinct, localized area of high metabolic or functional activity, represented by a red-to-yellow color gradient. The rest of the brain tissue in both hemispheres is shown in a uniform blue color, indicating lower activity levels. A vertical white line runs down the center of the image, separating the left and right hemispheres. A horizontal white line is positioned near the bottom of the brain image. The text 'ABA: 69013708' is located in the top left corner, and 'Pn' is in the bottom left corner.
