

ABA: 69095951

Cb vermis

The image displays a coronal cross-section of a human brain. A specific region in the posterior-inferior part of the brain, corresponding to the cerebellum, is highlighted in a vibrant blue color. This highlighted area is roughly oval-shaped and occupies the lower half of the image. Within this blue region, on the left side of the image, there are two distinct, brighter spots that appear yellowish-green, indicating areas of higher intensity or metabolic activity. A white crosshair is superimposed on the image, with a vertical line passing through the center of the brain and a horizontal line passing through the middle of the highlighted cerebellar region. The text 'ABA: 69095951' is located in the top-left corner, and 'Cb vermis' is located in the bottom-left corner, both in a white, sans-serif font.
