

ABA: 69102359

VMH

This is a fluorescence microscopy image of a brain section. The image shows a coronal slice of the brain with a central vertical line indicating the midline. The left hemisphere (viewer's left) shows several bright, irregularly shaped regions of fluorescence, primarily in the ventral medial hypothalamus (VMH) area. These regions are colored in shades of blue, cyan, and yellow, indicating varying intensities of fluorescence. The right hemisphere (viewer's right) is mostly dark, with some faint blue fluorescence visible. A horizontal white line crosses the image, and a vertical white line runs down the center, intersecting at the midline. The text 'ABA: 69102359' is in the top left corner, and 'VMH' is in the bottom left corner.
