

ABA: 69288620

SCN

The image shows a coronal section of a brain, likely from a rodent, with two large, symmetrical blue regions of interest. These regions are located in the lateral areas of the brain, possibly representing the hippocampus or a similar structure. The brain is centered on a vertical axis, and the blue regions are positioned on either side of this axis. The background is black, and the brain tissue is a light gray color. The text 'ABA: 69288620' is in the top left, and 'SCN' is in the bottom left.
