

ABA: 69407947

CA1

This is a fluorescence microscopy image of a brain section. The image is divided into four quadrants by a white crosshair. The left half of the image shows a bright, irregularly shaped region with a yellow-to-cyan color gradient, indicating high fluorescence intensity. This region is labeled 'CA1' in the bottom-left corner. The right half of the image is a solid, dark blue color, indicating low fluorescence intensity. This region is labeled 'ABA: 69407947' in the top-left corner. The overall background is black.
