IC

A blue brain scan image, likely a PET or SPECT scan, showing a coronal cross-section of a human brain. The image is centered on a black background. A white crosshair is overlaid on the image, with a vertical line and a horizontal line intersecting at the center. The brain tissue is represented by a blue color, with some areas appearing slightly brighter than others, indicating varying levels of activity or density. The overall shape of the brain is roughly oval, with some internal structures visible as darker blue or black areas.
