

ABA: 69527968

SCN

This image shows a coronal section of a brain, likely from a mouse, with a blue fluorescent signal. The signal is concentrated in the left hemisphere (viewer's left) and is most intense in the upper portion, near the top of the brain. The right hemisphere shows a much weaker, more uniform blue signal. A vertical white line runs down the center of the image, and a horizontal white line runs across the middle, intersecting at the center of the brain. The text 'ABA: 69527968' is in the top left corner, and 'SCN' is in the bottom left corner.
