

ABA: 69671863

ME

This is a PET scan image of a brain, showing a cross-section. The image is divided into four quadrants by a vertical and a horizontal white line. The left hemisphere (viewer's left) shows a focal area of increased uptake, indicated by a yellow and red color scale, suggesting a lesion or tumor. The right hemisphere (viewer's right) shows a more uniform, lower-level uptake, indicated by a blue color scale. The text 'ABA: 69671863' is in the top left, and 'ME' is in the bottom left.
