

ABA: 69736022

SCN

This fluorescence microscopy image displays a brain section with two primary regions of interest. The SCN (Suprachiasmatic Nucleus) is located in the lower-left quadrant, showing a dense, irregular pattern of bright blue fluorescence. The ABA (Area B, Anterior) is located in the upper-right quadrant, appearing as a more uniform, solid blue area. A white crosshair is centered on the image, dividing it into four quadrants. The background is black, and the text labels 'ABA: 69736022' and 'SCN' are positioned in the top-left and bottom-left corners, respectively.
