Arc

The image displays a false-color astronomical observation of a galaxy. The central region is the brightest, appearing in shades of yellow and orange. Two prominent, curved, high-intensity features, possibly jets or arcs, extend outwards from the center, appearing in shades of blue and white. The rest of the galaxy is dimmer, appearing in shades of blue. A white crosshair is overlaid on the image, with the vertical line passing through the center and the horizontal line intersecting it.
