

ABA:70302950

SCN

This image is a fluorescence micrograph of a coronal brain section. The image is divided into four quadrants by a vertical and a horizontal white line. The top-left quadrant contains the text 'ABA:70302950'. The bottom-left quadrant contains the text 'SCN'. The brain tissue is stained with a blue fluorescent dye, likely DAPI, which highlights the nuclei of cells. The staining is most prominent in the top-left quadrant, where there is a bright, localized cluster of blue-stained cells. The rest of the brain section shows a more diffuse, lower-intensity blue fluorescence. The background is black.
