

ABA:70303803

VMH

This image shows a fluorescence micrograph of a brain section, likely from a mouse, with a focus on the ventral medial hypothalamus (VMH). The image is split vertically by a white line. The left side shows a blue-stained brain section with several bright, elongated spots of fluorescence, indicating the presence of a specific marker. The right side shows a similar brain section but with a uniform, dim blue fluorescence across the entire area, suggesting a different experimental condition or a control. A horizontal white line is also present, intersecting the vertical one. The text 'ABA:70303803' is in the top left, and 'VMH' is in the bottom left.
