VMH

This is a fluorescence microscopy image of a brain section, likely from a rodent, showing the ventral medial hypothalamus (VMH). The image is divided into four quadrants by a vertical and a horizontal white line. The left half of the image shows a blue-stained brain section. There are two distinct areas of higher fluorescence: a small, bright yellow-orange spot in the upper left quadrant and a larger, bright blue spot in the lower left quadrant. The right half of the image is mostly black, indicating no signal or a different channel. The text 'ABA:70528276' is in the top left, and 'VMH' is in the bottom left.
