VMH

This is a fluorescence microscopy image of a brain section, likely from a rodent, showing the ventral medial hypothalamus (VMH). The image is divided into four quadrants by a vertical and a horizontal white line. The left half of the image shows a blue-stained brain section. The right half is mostly black, indicating no signal. There are two distinct bright spots: one in the upper-left quadrant and a larger, more intense one in the lower-right quadrant, which is at the intersection of the white lines. The text 'ABA:70598370' is in the top-left corner, and 'VMH' is in the bottom-left corner.
