

ABA:70805896

MD

This is an axial PET scan of a human brain. The image displays metabolic activity using a color scale where blue represents low activity and yellow/green represents high activity. The brain's symmetrical structure is visible, with higher activity concentrated in the central regions, likely the basal ganglia and thalamus. A white crosshair is overlaid on the image, with the vertical line passing through the center and the horizontal line intersecting it at the level of the scan. The text 'ABA:70805896' is located in the top left corner, and 'MD' is in the bottom left corner.
