VMH

This is a fluorescence microscopy image of a brain section, likely from a mouse, showing the ventral medial hypothalamus (VMH). The image is a coronal section, with the brain's midline running vertically. The VMH region is highlighted in bright blue and cyan, indicating high fluorescence intensity. The surrounding brain tissue is dark, with some lighter blue areas indicating lower intensity. A white crosshair is visible in the center of the image, with the vertical line passing through the midline and the horizontal line passing through the VMH region. The text 'ABA:70813926' is in the top left corner, and 'VMH' is in the bottom left corner.
