

ABA:70946471

VMH

This fluorescence microscopy image displays a coronal section of a brain. A vertical white line divides the image into two hemispheres. The left hemisphere shows a distinct, localized area of high-intensity fluorescence (yellow and red) in the ventral medial hypothalamus (VMH), which is indicated by the label 'VMH' in the bottom left corner. The rest of the brain tissue in both hemispheres shows low-intensity blue fluorescence. The text 'ABA:70946471' is located in the top left corner.
