VMH

This is a fluorescence microscopy image of a brain section. The image is divided into two main regions by a vertical white line. The left region shows a complex, multi-layered structure with a prominent yellow-green spot in the upper-middle section, indicating high fluorescence intensity. The right region is a solid, dark blue area, indicating low fluorescence intensity. A horizontal white line crosses the image near the bottom, and a vertical white line runs down the center, intersecting at the bottom center.
