

ABA:71021172

Arc

The image displays a coronal section of a brain scan. A vertical line and a horizontal line intersect at the center, dividing the image into four quadrants. In the upper-left quadrant, there is a distinct, localized area of high-intensity signal, represented by a color gradient from blue to yellow and red. The rest of the brain tissue in this quadrant and the entire right half of the image appear as a uniform blue color, indicating low signal intensity. The text 'ABA:71021172' is positioned in the top-left corner, and the text 'Arc' is in the bottom-left corner.
