

ABA:71281147

VMH

A coronal brain scan image, likely from a PET or SPECT study, showing a cross-section of the brain. The image is predominantly black, with a large, irregularly shaped blue region on the left side (patient's right hemisphere) indicating areas of increased radiotracer uptake. The blue region is more intense in some areas, appearing as a lighter blue or white. A vertical white line runs down the center of the image, and a horizontal white line runs across the middle, intersecting at the center. The text 'ABA:71281147' is located in the top-left corner, and 'VMH' is in the bottom-left corner.
