Cb lobe

The image displays a coronal cross-section of a brain. A large, irregularly shaped region in the lower half of the image is highlighted in a solid blue color. This region is roughly symmetrical about the midline but has a slight indentation in the center. Two small, bright blue dots are visible within the blue region, one on each side of the central indentation. The background is black, and a white crosshair is overlaid on the image, with the vertical line passing through the center of the blue region.
