

ABA:72079884

IC

This fluorescence microscopy image displays a cross-section of a plant root. The signal, likely representing ABA-induced activity, is visualized as a blue-to-yellow color scale. Two prominent, bright yellow-green spots are located in the upper portion of the image, indicating high signal intensity. The rest of the root section shows a more diffuse, lower-intensity blue signal. A white crosshair is overlaid on the image, with a vertical line passing through the center of the two bright spots and a horizontal line intersecting them. The text 'ABA:72079884' is in the top left, and 'IC' is in the bottom left.
