CA1

This is a fluorescence microscopy image of a brain section, likely from a rodent. The image shows a coronal slice with a central vertical structure, possibly the brainstem or ventricles. The surrounding tissue is stained, with a prominent curved band of high fluorescence (yellow/green) in the upper portion, which is identified as the CA1 region. The rest of the brain tissue shows lower fluorescence (blue). A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain section.
