

ABA:72283719

Pn

The image displays a coronal cross-section of a brain. The left hemisphere, as viewed from the patient's perspective, shows several distinct areas of high signal intensity, appearing as bright yellow and white spots against a blue background. These spots are concentrated in the upper central region. The right hemisphere shows a more uniform, lower signal intensity, appearing as a solid blue color. A vertical white line runs down the center of the image, separating the two hemispheres. The text 'ABA:72283719' is located in the top left corner, and 'Pn' is in the bottom left corner.
