

ABA:72283805

Pn

The image displays a coronal cross-section of a brain. Two distinct, bright yellow-green spots are visible at the base of the brain, near the midline, which may represent areas of increased metabolic activity or pathological changes. The rest of the brain tissue is shown in a dark blue color. A white crosshair is centered on the image, with the vertical line passing through the two bright spots. The text 'ABA:72283805' is located in the top left corner, and 'Pn' is in the bottom left corner.
