

ABA: 73496917

CA2/CA3

This fluorescence microscopy image displays a coronal section of a brain, with the CA2/CA3 region of the hippocampus highlighted. The image is characterized by a dark background with a grid of white lines. A prominent, bright yellow-green spot is visible in the upper left quadrant, indicating a high concentration of ABA staining. Other smaller, less intense spots are scattered throughout the image, particularly in the upper right and lower left areas. The overall image is in grayscale, with the ABA staining appearing as bright yellow-green against the dark background.
