

ABA: 73513603

CA1

This is a fluorescence microscopy image of a brain section. The image is divided into four quadrants by a white crosshair. The left half of the image shows a complex, convoluted structure, likely the hippocampus, with several bright yellow-green spots indicating areas of high fluorescence. The right half of the image is mostly dark blue, suggesting a different tissue type or a control region. The text 'ABA: 73513603' is in the top left, and 'CA1' is in the bottom left.
