

ABA:73573163

Tg

A fluorescence microscopy image of a brain section, likely a coronal slice, showing blue fluorescence. The image is divided into four quadrants by a white crosshair. The left hemisphere (left side of the image) shows a bright blue signal, while the right hemisphere (right side of the image) is dark. The blue signal is concentrated in the central and lower-left regions of the left hemisphere. The text 'ABA:73573163' is in the top-left corner and 'Tg' is in the bottom-left corner.
