

ABA:73769325

VMH

This is a fluorescence microscopy image of a brain section, likely from a mouse, showing the ventral medial hypothalamus (VMH). The image is presented in a false-color format where the signal is represented by shades of blue against a black background. The signal is concentrated in the central region of the brain, with several distinct, bright spots indicating areas of high fluorescence intensity. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain and the horizontal line intersecting it. The text 'ABA:73769325' is located in the top left corner, and 'VMH' is in the bottom left corner.
