

ABA: 74635382

Pn

The image displays two side-by-side brain scan slices, likely PET or SPECT, showing a coronal cross-section of the brain. The left image shows a distinct, bright, localized area of high signal intensity in the upper left quadrant, which is absent in the right image. Both images are labeled 'ABA: 74635382' at the top and 'Pn' at the bottom. A vertical line separates the two images, and a horizontal line is visible at the bottom.
