

ABA: 74819235

VMH

This is a fluorescence microscopy image of a brain section, likely from a rodent, showing the ventral medial hypothalamus (VMH). The image is presented in a split-view format, with the left half showing a control or baseline state and the right half showing a state after ABA treatment. The ABA treatment is identified by the label 'ABA: 74819235' in the top left corner. The VMH region is labeled in the bottom left corner. The image displays a blue signal, which is more intense and localized in the VMH region on the right side compared to the left side, indicating a change in the fluorescent signal upon ABA treatment. A vertical white line separates the two halves, and a horizontal white line is visible across the middle of the image.
