This is an axial PET scan of a human brain. The image displays metabolic activity using a color scale where blue represents lower activity and yellow/green represents higher activity. The brain is divided into two hemispheres by a vertical line. A horizontal line crosses the middle of the image. The text 'ABA: 74819554' is in the top left, and 'SN' is in the bottom left. The scan shows a symmetrical pattern of activity, with higher concentrations visible in the lower portions of the brain, particularly in the posterior regions.
