

ABA: 74822814

SN

This image is a coronal PET scan of a human brain. The brain is shown in a cross-section, with the left hemisphere on the left and the right hemisphere on the right. A vertical white line runs down the center, representing the midline. A horizontal white line runs across the middle of the brain. A small, bright, blue-white spot is visible in the left hemisphere, indicating a focal area of increased radiotracer uptake. The rest of the brain appears dark blue, indicating low levels of uptake. The text 'ABA: 74822814' is in the top left corner, and 'SN' is in the bottom left corner.
