

ABA:74957910

DM

This is a coronal brain MRI scan. The image shows a cross-section of the brain with a blue overlay representing a specific region of interest. A small, bright, cyan-colored spot is visible in the lower-left quadrant of the brain, indicating a focal lesion or abnormality. The brain is divided into two hemispheres by a vertical line, and the image is also divided horizontally by a line. The text 'ABA:74957910' is in the top-left corner, and 'DM' is in the bottom-left corner.
