

ABA:75042261

SCN

This is a coronal PET scan of a human brain. The image displays metabolic activity using a color scale where blue represents lower activity and yellow represents higher activity. Two vertical white lines are positioned symmetrically on either side of the midline, and a horizontal white line runs across the bottom of the image. The text 'ABA:75042261' is located in the top left corner, and 'SCN' is in the bottom left corner. The brain's internal structures, including the cerebral cortex and subcortical regions, are visible with varying intensities of blue and yellow.
