

ABA:75147762

A anterior

The image displays a fluorescence micrograph of a Drosophila embryo. The overall shape is a broad, oval structure with a central vertical indentation. The fluorescence is primarily blue, with two distinct, bright spots of cyan/green color located at the anterior end, near the bottom of the image. A horizontal white line and a vertical white line intersect at the center of the embryo, serving as orientation markers. The text 'ABA:75147762' is in the top left, and 'A anterior' is in the bottom left.
