

ABA: 75147767

SC

This image is a coronal PET scan of a human brain. The brain is shown in a cross-section, with the two hemispheres visible. The image is predominantly blue, indicating low levels of metabolic activity. There are two distinct areas of increased activity, shown in yellow and red, located in the posterior horns of the lateral ventricles, one on each side. A white crosshair is overlaid on the image, with the vertical line passing through the midline and the horizontal line passing through the level of the activation. The text 'ABA: 75147767' is in the top left, and 'SC' is in the bottom left.
